

As a user, I want to:

- View player information and the club they play for
- Sign up to the app
- Sign in to the app
- Change my name on the app
- Add my favourite clubs
- Create custom teams
- Share these custom teams with other users
- Comment on other custom teams
- Delete my custom teams when I think I've picked a better team
- Logout when I'm not using the app
- Delete my account
- Navigate between pages when logged in

Tech Stack:

- PostgreSQL
- Ruby on Rails
- React
- <https://www.api-football.com/> for seed data on players and club
- Axios
